Problem : **Two Means**

Write a program that reads a sequence of numbers, some positive and some negative, until a zero is input. The program should output the mean of the negatives and the mean of the positives.

Examples :

input						output	
-3	-1	4	9	2	0	-2	5
-10	6.5	-12	0			-11	6.5
70	110	120	0			none	100
